

**If an IEP Wasn't Implemented
Prior to Release of Web IEP 2009 on July 1, 2009**

Web IEP 2009 (or Version 6) of the web IEP was released on July 1, 2009. All 2008-2009 IEPs were to have been implemented prior to the release.

If an IEP is not Implemented prior to July 1, the new required data items put in place on July 1 will prevent Implementation of the 2008-09 IEP until they are completed. This is the same practice that has been established for the past several years.

Here is an example: All students will need a new set of Ethnicity and Race questions completed on 2009-2010 IEPs beginning July 1. These questions will appear at the bottom of Page A. Any 2008-09 IEP not implemented or being Amended will also need these items completed.

If you are a teacher or service provider and have any questions about this practice, please contact your AEA's web IEP administrator.
